INDIK™ 2.0 GETS READY TO DEPLOY ITS FULL POWER

PART 2

Very soon, INDIK™ 2.0 will be at your door. You will quickly be impressed by the advanced, high-performance wizard that comes with INDIK™ 2.0. It will simplify your work and give you even quicker and easier access to the key information you need to make judicious decisions at any time and to manage your organization's performance.

This high-calibre wizard can more effectively select the most appropriate metrics for your sector of activity, notably in IT management and cybersecurity. It then proposes dashboard templates suited to the particular needs of the manager. From there, its integrated process takes care of producing the dashboards according to the desired frequency, overseeing and following up on each step of the workflow. Powerful and user-friendly, INDIK™ 2.0 will meet all your expectations… and more!

Find out more… Less effort, more results

Selecting the metrics that are most relevant to your business context is a demanding exercise. The metrics and dashboards you choose will have a direct impact on the results you hope to obtain. Version 2.0 of INDIK™ enables you to query the Algorithmic Knowledge Objects (AKO) using a sophisticated wizard that guides you with precise questions. This automated assistance leads you to the metrics and dashboards best suited to your particular needs. What's more, INDIK™ 2.0 retains all the customized configurations of each metric. No need to start the whole process over again each time you want to generate a dashboard. Less effort, more results!

Be sure to count on the intelligence of this wizard and the power of Algorithmic Knowledge Objects (AKO), a pairing exclusive to INDIK™—an unbeatable tool for building meaningful dashboards that are essential to informed decision-making and successful performance management.
